

JOB OFFER

TECHNOLOGY EVANGELIST (M/F)

→ Contract type: **CDI** permanent, full time (40 hours per week)

About DataThings

Founded in 2017 as a spin-off of the Interdisciplinary Center for Security, Reliability and Trust (SnT) of the University of Luxembourg, DataThings is specialized in data processing solutions, from storage to machine learning, for large and small datasets. DataThings edits and sells three software products and provides services of training and development of dedicated intelligent software systems to transform data into actionable and valuable insights to support our clients in taking the best operational decisions.

With its headquarters in Luxembourg, DataThings takes advantage of its position in the “heart of Europe”, to provide dedicated data processing and machine learning solutions to a wide range of clients, from SMEs to large private companies, as well as to the public sector. DataThings uses its own data platform, called GreyCat, to develop tailor-made data analytics solutions for its clients. Fruit of several years of research and development, the GreyCat platform integrates data storage, processing and analytics in one single tool for increased efficiency in computation and efforts to develop.

Your mission

You will join a highly qualified and multi-disciplinary team having competencies to cover the full development chain of a software system for data processing, including system and network administration, internet of things, embedded computing, image processing, data storage and analytics, machine learning, web development, and integration testing.

With the support of the team, and in close collaboration with our sales and marketing team (in constitution) and the founders, your mission will consist in making DataThings expertise and technologies more visible. The aim is to increase awareness on our existence, our expertise, technology and products, and their unique selling proposition. For this mission, we expect you to, amongst other activities:

- Write texts, articles, content for publications, vulgarizing our activities for a wide audience
- Define communication strategies for each business line of DataThings and execute
- Manage social medias and social content, react, comment, follow
- Participate to fairs and events to disseminate
- Participate and support the creation of marketing content

Your profile

You like to write content, communicate with people and exchange.

You have a deep understanding of the domain of data processing, including data management systems (relational, time series, graph DBs), data processing solutions (Python and associated tools, TensorFlow, etc.), programming languages (Java, C#), intermediate transformation tools (ETLs, JPA/JDO, etc.), and visualization tools (Qlik, Tableau, Power BI, etc.).

You work proficiently in verbal and written English, take initiatives, responsibilities, and can work in independence. You are motivated to help grow the visibility of the company, integrate quickly, and work in a dynamic multi-cultural team spirit.

What we offer

- Opportunity to influence and shape a growing startup
- Entrepreneurial spirit and fast-paced environment in a dynamic atmosphere
- Excellent work environment
- A young, motivated, and talented multicultural team
- Good work life balance
- Challenging projects

In short

- Contract type: **CDI** - Permanent, full **time** (40 hours per week)
- Starting date: **As soon as possible**
- Office location: Close to the central train station in Luxembourg city

If this sounds like you, please can send your application with CV & motivation letter to jobs@datathings.com
