DataThings
The efficient AI twin maker

Job Opening · 2026
Luxembourg hybrid · Remote in FR & DE · Full-time

WE'RE HIRING

Product Owner & Customer Relationship

Join DataThings — a Luxembourgish deep-tech company turning **complex live data** into **actionable decisions** through AI-powered digital twins. As the bridge between our engineering team and our clients, you'll **shape the product** and **own the relationship** that makes operational AI real, in production, every day.

LOCATION	TYPE	TEAM	START
Hybrid LU · Remote FR/DE	**Full-time / CDI**	**Product · Customer**	**As soon as possible**

What you'll do

- **Own the product roadmap** for our digital twin solutions, translating client needs into clear, prioritized backlogs.
- **Lead client relationships** end-to-end — from discovery and scoping to delivery, training, and follow-up.
- **Reach out to prospects and partners**, and actively expand our **reselling partners' network**.
- Work hand-in-hand with our **engineering and ML teams** to ship features that solve real operational problems.
- Drive **adoption** across electrical power systems, energy, and smart-infrastructure domains.
- Be the voice of the customer in product, and the voice of product to the customer.

What we offer

- **Flexibility** — hybrid & trust-based
- **Startup spirit** & real ownership
- Continuous learning
- Active contribution to the **energy transition**
- Award-winning tech (FEDIL 2024)
- A team of researchers & builders

Your profile

- Strong expertise in **electrical power systems** — generation, transmission, distribution, or grid operations.
- Solid skills in **IT systems architecture** — designing, integrating, and reasoning about complex software and data systems.
- 3+ years in a **Product Owner**, Project Manager, or Customer Success role in a tech, energy, or industrial environment.
- Comfortable with **data, AI, or analytics** conversations applied to power-system challenges.
- Excellent **client-facing skills**: discovery, scoping, presenting, negotiating.
- Fluent **English** is mandatory; **German** is a strong asset.
- Curious, structured, autonomous — and energized by complex industrial problems.

About DataThings

Founded in **2017** as a spin-off of the University of Luxembourg / SnT, DataThings builds **tailor-made digital twins** on its **GreyCat** technology — a temporal, graph and vector database that runs anywhere, from data centers to commodity hardware. We deliver across **energy, industry, and public sector**, **100% made in Europe**.
